***Reason For Allowance***

The following is an examiner's statement of reasons for allowance:

1. Applicant arguments filed on Nov 02, 2004 are considered persuasive in regard to patentability over the prior art of record. As per claim 1, None of the prior art of record teach or suggest A method for processing data on a distributed computing system that includes a plurality of nodes, the method comprising:

maintaining mapping data that specifies work that can be performed by the plurality of nodes;

in response to receiving from a first process on a first node from the plurality of nodes, a first work request to perform first work, determining based upon the first work and the mapping data, that a first portion of the first work is to be performed on a second node from the plurality of nodes and that a second portion of the first work is to be performed on a third node from the plurality of nodes;

providing a second work request to a second process on the second node, wherein the first second work request specifies that the first portion of the first work is to be performed and that results of performing the first portion of the first work are to be provided directly to the first process;

providing a third work request to a third process on the third node, wherein the third work request specifies that the second portion of the first work is to be performed and that results of performing the second portion of the first work are to be provided directly to the first process.

This functionality is supported by the specification at pages 7-11, Fig 3.
